Installing Power BI Desktop

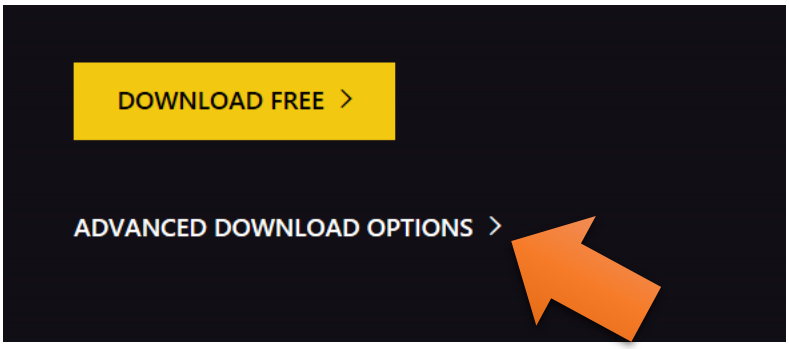
Document Version 2.1.4 - Naji El Kotob

Power BI is an advanced and integrated self-service business intelligence system for analyzing data and presenting actionable information to help corporate executives, business managers and other end users make more **informed business decisions**.

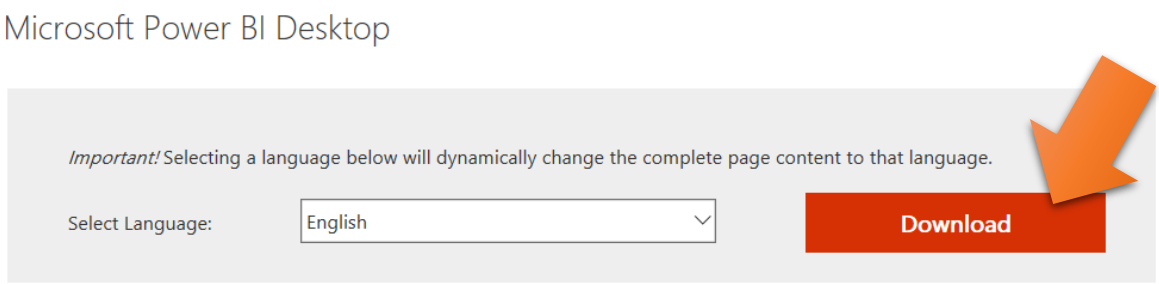
Note: If you have Windows 10, Open "Microsoft Store", Search for "Power BI Desktop", click on the button "Get" and follow instructions. For manual download and setup please check below.

Download and install Power BI Desktop

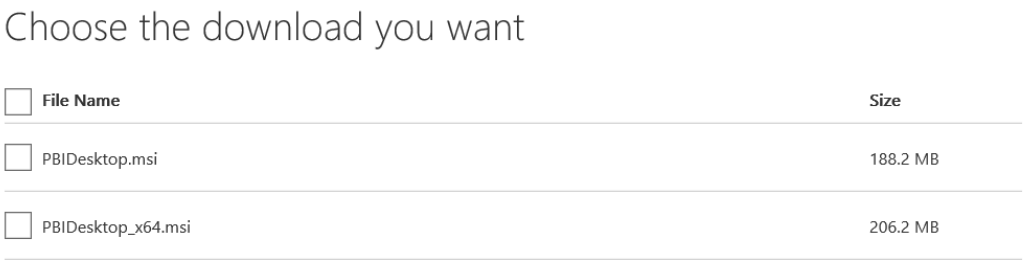
1. Go to https://powerbi.microsoft.com/desktop to download the latest version of Power BI Desktop



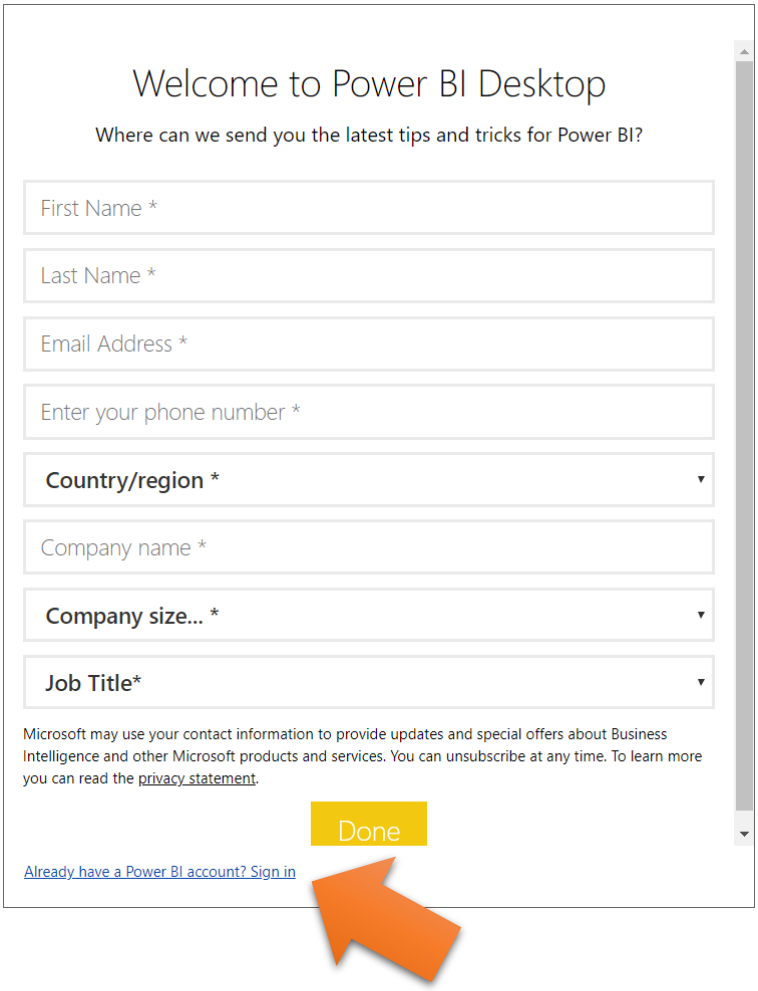
2. Click **Advanced download options**
3. Click **Download**



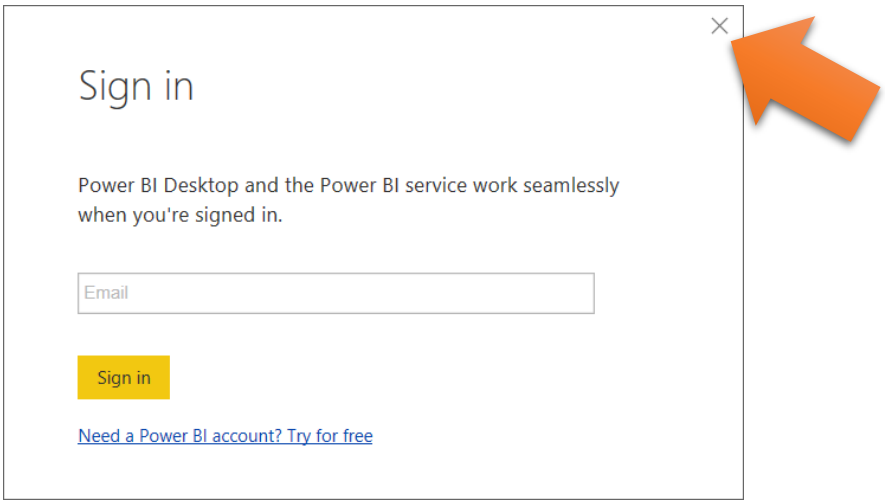
4. Choose between the 64-bit or 32-bit version *(Don't know how to choose? Go to "Which Windows operating system am I running" https://support.microsoft.com/en-us/help/13443/windows-which-operating-system)*



Setup completed! You don't need to sign-up to start using Power BI desktop, click on "Already have a Power BI account? Sign-in"



Press Esc or click on "x"



Which version to install?

- If you have a 32 bit machine, you need to install the 32bit Power BI Desktop.
- If you have a 32 bit Office installed (regardless of your machine), you need to install the 32 bit Power BI Desktop.
- Otherwise, you can install the 64 bit PBI Desktop.

Minimum requirements

- Windows 7 / Windows Server 2008 R2, or later
- .NET 4.5
- Internet Explorer 10 or later
